

# Hi, I'm David and I like to create engaging, stunning, awe-inspiring, mind-blowing, things.

A LITTLE OVER THE TOP?

---

## EXPERIENCE

### Designer/Front-end Developer › Spearia — Comstock Park, Michigan | 01/09 - Present

Spearia's expertise is designing and building great looking and functioning websites. My role in that process is to work directly with the client designing a product that makes sense and looks great. After design is complete I then work in tandem with a developer to build the site and integrate it into one of the many content management systems we work with (ExpressionEngine, Drupal, Wordpress).

Notable accomplishments:

- Designed Michigan Blood website
- Designed and developed Meijer's Grand Opening sites
- Designed identity and website for ADAC Technologies
- Designed Fellowship of Christian Athlete's — FCA Campus 101

### Lead Designer › Rapids Computer Solutions — Grand Rapids, Michigan | 04/08 - 11/08

Rapids Computer Solutions is a small information and technology solutions company. The owner, David Marker, approached me to get on board. In addition to doing design and front-end development work, I acted as a project manager by working directly with clients and scheduling projects. I also coordinated with and managed our developer's schedule. We amicably parted ways to pursue different things.

### Office Assistant/Aspiring Designer › Emergency Vehicle Services, Inc. — Greenville, Michigan | 07/04 - 01/09

After moving out of my parent's house and starting school at Grand Rapids Community College I needed to get a "real" job. I ended up landing a gig with EVS, a small fire equipment and firetruck repair company. I did a lot of different things, some fun, some mundane. That list included: data entry, networking support, answering phones, shipping/receiving, both internet and in-store sales, invoicing, purchasing, inventory, decal application, and even grabbing the mail. There were many great things I learned from my time at EVS, however, it was a job and not a career.

### Freelance Work › 01/02 - Present

I started taking my freelance work more seriously sophomore year in high school. I provided design and basic development for many local small businesses. Since that time I have grown as a designer and developer and now work regularly with large, well-established, companies as well as small businesses and non-profits. Below is a list of some of the projects I've worked on.

- Borgess Health
- Fritz Wahlfield Construction
- Laura Slater — Midwife
- Summer & Starlight
- Sounds Good Ink
- Rivertown Finance
